NEW QUESTION: 2

You notice that publicly registered users see the SharePoint ribbon.

You need to ensure that the SharePoint ribbon is available only to content authors and administrators.

What should you do?

A. Option A

B. Option C

C. Option D

D. Option B

Answer: C

Explanation:

If you designed a custom master page for your SharePoint 2010 and the ribbon is in your way, SharePoint has a built-in control that lets you hide it from anonymous users in few easy steps. Open and check-out your master page, find where your ribbon control starts or look for

```
<WebPartPages:SPWebPartManager id="m" runat="Server"/>
```

Place this control below

```
<Sharepoint:SPSecurityTrimmedControl runat="server"
```

```
Permissions="AddAndCustomizePages">. Find where your ribbon control ends or look for
```

```
</div id=s4-workspace> and place the closing control above it
```

```
</Sharepoint:SPSecurityTrimmedControl>. Save, check-in the master page and publish it
```

to see the changes. From now on, only logged in users with the right permissions will be able to see the ribbon on the top.

Incorrect:

Not B: Permission should be set to AddAndCustomizePages not ManageSubWeb.

Reference: SharePoint, Hide the Ribbon from Anonymous Users

NEW QUESTION: 3

You plan to allow users to run internal applications from outside the company's network. You have a Windows Server 2012 R2 that has the Active Directory Federation Services (AD FS) role installed. You must secure on-premises resources by using multi-factor authentication (MFA). You need to design a solution to enforce different access levels for users with personal Windows 8.1 or iOS 8 devices.

Solution: You install a local instance of the MFA Server. You

connect the instance to the Microsoft Azure MFA provider and then you use Microsoft Intune to manage personal devices. Does this meet the goal?

A. Yes

B. No

Answer: A
