NEW QUESTION: 1

In order to maintain strategic flexibility and the ability to bring a cloud system back internally, which of the following is the MOST important requirement in the contract?

- A. Yearly independent audit is performed to measure performance
- B. Cloud subscriber maintains ownership of their data
- C. Cloud provider has ability to terminate contract
- D. One week timeframe for termination of service

Answer: B

NEW QUESTION: 2

A company hosts a two-tier application that consists of a publicly accessible web server that communicates with a private database. Only HTTPS port 443 traffic to the web server must be allowed from the Internet.

Which of the following options will achieve these requirements? (Choose two.)

- A. Network ACL rule that allows port 443 inbound and all ports outbound for Internet traffic.
- B. Security group rule that allows Internet traffic for port 443 in both inbound and outbound.
- C. Security group rule that denies all inbound Internet traffic except port 443.
- D. Security group rule that allows inbound Internet traffic for port 443.
- E. Network ACL rule that allows port 443 for both inbound and outbound for all Internet traffic.

Answer: A,D

NEW QUESTION: 3

You have a server that has SQL Server 2014 installed.

The server contains 100 user databases.

You need to recommend a backup solution for the user databases.

The solution must meet the following requirements:

Perform a transaction log backup every hour.

Perform a full backup of each database every week.

Perform a differential backup of each database every day.

Ensure that new user databases are added automatically to the backup solution.

What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. A Data Definition Language (DDL) trigger
- B. SQL Server Agent jobs
- C. A maintenance plan

D. Policy-Based Management

Answer: C

Explanation:

Maintenance plans create a workflow of the tasks required to make sure that your database is optimized, regularly backed up, and free of inconsistencies.

Maintenance plans can be created to perform the following task (among others): Back up the database and transaction log files. Database and log backups can be retained for a specified period. This lets you create a history of backups to be used if you have to restore the database to a time earlier than the last database backup. You can also perform differential backups.

NEW QUESTION: 4

What Rational Products can be used together to provide a comprehensive Application Portfolio Management solution?

- A. Rational Focal Point, Rational Asset Analyzer and Rational System Architect.
- B. Rational Rhapsody, Rational Developer for z, and Rational Insight.
- C. Rational Quality Manager, Rational Team Concert, and Rational Requirements Composer.
- D. Rational Team Concert, Rational Software Architect, and Rational Focal Point.

Answer: A

Explanation:
