NEW QUESTION: 1

The customer has just installed an anti-virus program on a working Messaging Application Server (MAS), and finds that messages are no longer being sent. It has been verified that "on-demand scanning" has been chosen at scheduled intervals. What is causing this problem?

- A.** The anti-virus is blocking port 110.
- B.** The anti-virus is scheduled to run at the same time as the system backup.
- C.** The anti-virus has been placed in the wrong folder on the MAS.
- D.** The anti-virus has blocked TCP/IP port 25.

Answer: D

NEW QUESTION: 2

The multi-disciplinary approach involves individuals from several professions that are responsible for the delivery of services. Each team member is only accountable for activities related to their discipline. Although this method is easy, it is not always effective. What approach involves constant interaction between professionals, working towards the same goal?

- A. None of the above
- B. Interdisciplinary
- C. Individualism
- D. Trans-disciplinary

Answer: B

Explanation:

The interdisciplinary approach to service enhances communication among several professionals. A client and their family will be among the team participants. Each individual will collaborate with the others to ensure smooth progress and a positive attitude towards all disciplines is quite apparent. Professional activities appear to flow into one another with no break in services.
