You need to reduce the likelihood that the sign-ins are identified as risky.

What should you do?

- A. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- B. From the Security & Compliance admin center, add the users to the Security Readers role group.
- C. From the Conditional access blade in the Azure Active Directory admin center, create named locations.
- D. From the Security & Compliance admin center, create a classification label.

**Answer: C**

Explanation:

Explanation

A named location can be configured as a trusted location.

Typically, trusted locations are network areas that are controlled by your IT department. In addition to Conditional Access, trusted named locations are also used by Azure Identity Protection and Azure AD security reports to reduce false positives for risky sign-ins.
