Answer: D

NEW QUESTION: 4

Refer to the exhibit.

Which statement is true?

- A. IPv6 traffic can be forwarded from this router, but only on Ethernet1/0.
- B. There is no issue with forwarding IPv6 traffic from this router.
- C. IPv6 unicast routing is not enabled on this router.
- D. Some IPv6 traffic will be blackholed from this router.

Answer: D

Explanation:

Here we see that the IPV6 default route shows two different paths to take, one via Ethernet 1/0 and one via Ethernet 0/0. However, only Eth 1/0 shows a next hop IPV6 address (the link local IPV6 address). There is no link local next hop addressed known on Eth 0/0. Therefore, traffic to all destinations will be load balanced over the two paths, but only half of the IPv6 traffic will be sent to the correct upstream router.
