Backup and Recovery in Configuration Manager
Enterprise solutions such as System Center 2012 Configuration
Manager must prepare for both backup and recovery operationsto
avoid loss of critical data. For Configuration
Manager sites, this preparation ensures that sites and
hierarchies are recovered with the least data loss and in the
quickest possible time.

maintenance task that runs on a schedule and backs up the site
database, specific registry keys, and specific folders and
files.
Backup Maintenance Task

schedulingthe predefined

Backup Site Server maintenance task. You can back up a central administration site and primary site, but there is no backup support for secondary sites or site system servers.

NEW QUESTION: 3
Given the network diagram.

Which address would successfully summarize only the networks seen?
A. 192.168.8.0/21
B. 192.168.12.0/20
C. 192.168.8.0/20
D. These networks cannot be summarized.
E. 192.168.0.0/24
F. 192.168.16.0/21
Answer: A
Explanation:
let's suppose it is a /20 then we would have addresses from 192.168.0.1 to 192.168.15.255 Now let's suppose it is a /21 then we would have addresses from 192.168.8.1 to 192.168.15.255
So both summaries encompass the networks we want to summarize but the second one is the most restrictive one as it only encompasses the networks we were asked to summarize and not others so it is the correct summary.
In fact just count the number of subnets which is 8 and find the exponent of 2 which is 8, that gives you 3 and to find out the summary mask just do /24 - 3 = /21.
if you make it in binary you'll find out the answer too:
the interesting octet is 3rd one so let's convert in binary.
8 0000 1000
9 0000 1001
1 0 0000 1010
1 1 0000 1011
1 2 0000 1100
1 3 0000 1101
1 4 0000 1110
1 5 0000 1111
I've bolded the bits in common there are 5 so 16+5=21 which is mask and address is
1 92.168.8.0
