C-S4CPR-2105 test engine for sure pass, You just need to check your mailbox and take your time to study, Using our products does not take you too much time but you can get a very high rate of return.

Then you don't have to spend extra time searching [Reliable C-SACP-2107 Real Exam](#) for information when you're facing other exams later, just choose us again, Only 20-30 hours on our C-S4CPR-2105 learning guide are needed for the client to prepare for the test and it saves our client's time and energy.

We do not use their data for any marketing and other purposes, The goal of our C-S4CPR-2105 latest exam guide is prompting you to challenge your limitations, They are promising C-S4CPR-2105 practice materials with no errors.

If you can successfully pass the C-S4CPR-2105 exam with the help of our Lagunamarine, we hope you can remember our common efforts, All you need to pay is your login and password.

Hence, the C-S4CPR-2105 Exam Questions have been developed into a simple to understand language and in the shortest possible number of question.

#### **NEW QUESTION: 1**

You are working as a security consultant with a global insurance organization which is using Microsoft Azure Active Directory (AD) as identity provided to manager user login/passwords. When a user logs in to Oracle Cloud infrastructure (OCI) console, it should get authenticated by Azure AD.

Which set of steps are required to configure at OCI side in

order to get it enabled

**A.** Setup Azure AD as an Enterprise Application, configure OCI for single sign-on, map Azure AD groups to OCI groups, set up the IAM policies to govern access to Azure AD groups

**B.** Setup Azure AD as an Enterprise Application, map Azure AD users and groups and policies to OCI groups and users

**C.** Setup Azure AD as an Identity Provider, map Azure AD groups to OCI groups, set up the IAM policies to govern access to Azure AD groups

**D.** Setup Azure AD as an Identity Provider, Import users and groups from Azure AD to OCI, set up IAM policies to govern access to Azure AD groups

**Answer: C**

Explanation:

Federating with Microsoft Azure Active Directory

To federate with Azure AD, you set up Oracle Cloud

Infrastructure as a basic SAML single sign-on application in Azure AD. To set up this application, you perform some steps in the Oracle Cloud Infrastructure Console and some steps in Azure AD.

Following is the general process an administrator goes through to set up the federation. Details for each step are given in the next section.

In Oracle Cloud Infrastructure, download the federation metadata document.

In Azure AD, set up Oracle Cloud Infrastructure Console as an enterprise application.

In Azure AD, configure the Oracle Cloud Infrastructure enterprise application for single sign-on.

In Azure AD, set up the user attributes and claims.

In Azure AD, download the Azure AD SAML metadata document.

In Azure AD, assign user groups to the application.

In Oracle Cloud Infrastructure, set up Azure AD as an identity provider.

In Oracle Cloud Infrastructure, map your Azure AD groups to Oracle Cloud Infrastructure groups.

In Oracle Cloud Infrastructure, set up the IAM policies to govern access for your Azure AD groups.

Share the Oracle Cloud Infrastructure sign-in URL with your user

**NEW QUESTION: 2**

**A.** ip dhcp pool vlan20  
option 43 ascii '10.10.10.10'

**B.** ip dhcp pool vlan20  
option 43 hex f1040a0a0a0a

C. ipdhcp pool vlan1  
option 43 hex f1040a0a0a0a  
D. interface vlan20  
ip helper-address 10.10.10.10  
E. ipdhcp pool vlan1  
option 43 ascii '10.10.10.10'  
F. interface vlan1  
ip helper-address 10.10.10.10

**Answer: B**

**NEW QUESTION: 3**

Your company has five main offices. Each office contains a data center.

You plan to deploy an Active Directory forest and an Exchange Server 2013 organization. Each office will be configured as a separate Active Directory site.

You need to recommend an Exchange Server 2013 deployment strategy that meets the following requirements:

Replicates user mailboxes across multiple servers

Creates a temporary copy of outbound email messages

Minimizes the number of servers deployed to the network

What should you recommend?

- A. In each site, deploy two servers that have both the Mailbox server role and the Client Access server role installed.
- B. In each site, deploy two servers that have the Mailbox server role installed and two servers that have the Client Access server role installed.
- C. In each site, deploy one server that has both the Mailbox server role and the Client Access server role installed.
- D. In one site, deploy two servers that have the Mailbox server role installed. In all other sites, deploy one server that has the Client Access server role installed.

**Answer: C**
