#### **NEW QUESTION: 1**

A telecommunication company is experiencing high churn rate. They have more than five million customers. They have more than 400TB of call detail records per year. The majority of their customers are prepaid, so they can change the telecom provider any time. In order to remedy the situation, they want to understand the customer behavior. For that reason they want to build the individual profile of each customer. They also want to enrich the profile by incorporating social media data. Given this set of requirements, which of the following would you recommend?

- A. IBM Cloudant
- B. RDBMS
- C. Storm
- D. Hadoop

**Answer: C**

**NEW QUESTION: 3**

You are the virtualization administrator for an organization. The organization uses all components of System Center 2012 R2 in the production environment. A power supply in a Hyper-v host server fails. The host server continues to run and host virtual machines in this degraded state.

You have the following requirements:

- Move virtual machines from host servers that are running in a degraded state to another host server.
- Prevent placement of new virtual machines on degraded host servers.

You need to configure the environment.

Which System Center feature should you implement?

- A. Dynamic Optimization
- B. Shared VHDX files
- C. Performance and Resource Optimization (PRO)
- D. Placement Rules

**Answer: C**

Explanation:

Ref: <http://technet.microsoft.com/en-us/gg552992.aspx>

What is Performance and Resource Optimization (PRO)? PRO helps ensure that virtual machine hosts and virtual machines are operating in the most efficient possible manner. PRO generates recommendations for remedial actions based on alerts that Operations Manager generates. You can configure PRO to implement the preconfigured corrective actions automatically.

**NEW QUESTION: 4**
