**Answer: A,C**

Explanation:

Explanation/Reference:

Answer options C and B are correct.

When you import a folder of sequenced image files, in Photoshop CS6, each image becomes a frame in a video layer.

1. Make sure that the image files are named sequentially and are in one folder.
2. The final animation will be much better if all files have the same pixel dimensions.
3. The files that are being used as frames should be the only files in the folder.
4. Name the files in alphabetical or numeric order to order frames correctly for the animation. For example, file01, file02, file03, and so forth.

Answer options A and D are incorrect. These are not valid steps.
