If you really want to pass the Nonprofit-Cloud-Consultant exam, you should choose our first-class Nonprofit-Cloud-Consultant study materials.

NEW QUESTION: 1

You are creating a SQL Server Analysis Services (SSAS) multidimensional database.

Users need a time dimension for:
Dates

Delivery dates

Ship dates

You need to implement the minimum number of required SSAS objects.

What should you do?

- A.** Create a dimension with one attribute hierarchy. Set the IsAggregatable property to False and then set the DefaultMember property. Use a many-to-many relationship to link the dimension to the measure group.
- B.** Add a hidden measure that uses the Sum aggregate function. Add a calculated measure aggregating the measure along the time dimension.
- C.** Create a dimension. Create regular relationships between the cube dimension and the measure group. Configure the relationships to use different dimension attributes.
- D.** Create a new named calculation in the data source view to calculate a rolling sum. Add a measure that uses the Max aggregate function based on the named calculation.
- E.** Add a measure group that has one measure that uses the DistinctCount aggregate function.
- F.** Use role playing dimensions.
- G.** Add a calculated measure based on an expression that counts members filtered by the Exists and NonEmpty functions.
- H.** Add a measure that uses the Count aggregate function to an existing measure group.
- I.** Create a dimension with one attribute hierarchy. Set the IsAggregatable property to False and then set the DefaultMember property. Use a regular relationship between the dimension and measure group.
- J.** Create a dimension with one attribute hierarchy. Set the ValueColumn property, set the IsAggregatable property to False, and then set the DefaultMember property. Configure the cube dimension so that it does not have a relationship with the measure group. Add a calculated measure that uses the MemberValue attribute property.
- K.** Use the Business Intelligence Wizard to define dimension intelligence.
- L.** Add a measure that uses the DistinctCount aggregate function to an existing measure group.
- M.** Create a dimension. Then add a cube dimension and link it several times to the measure group.
- N.** Create several dimensions. Add each dimension to the cube.
- O.** Add a measure that uses the LastNonEmpty aggregate function. Use a regular relationship between the time dimension and the measure group.

Answer: F

NEW QUESTION: 2
