Can I get samples, Latest H12-931-ENU exam questions are assembled in our practice test modernizes your way of learning and replaces the burdensome preparation techniques with flexible learning.

#### **NEW QUESTION: 1**

A user has an RSA SecurID Key Fob. The Key Fob Change Interval is 60 seconds and has been used successfully in the past. If the RSA Authentication Manager is now out of synch with the token by 2 minutes. What will happen when the user tries to authenticate through a UNIX Agent? The Authentication Manager will

**A.** request the user for next tokencode, adjust the user's token offset value, and authenticate the user.

- B. post a "Token Requires Resync" message in the log and deny access to the user.
- C. reject the PASSCODE and the user will receive an "Access Denied" message.
- D. automatically adjust the user's token offset value and authenticate the user.

**Answer: A**

**NEW QUESTION: 2**

Which two statements about Infrastructure ACLs on Cisco IOS software are true? (Choose two.)

- A. Infrastructure ACLs are used to block-permit the transit traffic.
- B. Infrastructure ACLs are used to block-permit the traffic in the router forwarding path.
- C. Infrastructure ACLs only protect device physical management interface.
- D. Infrastructure ACLs are used to block-permit the traffic handled by the route processor.

**Answer: C,D**

Explanation:

Limit Network Access with Access Control Lists Devised to prevent unauthorized direct communication to network devices, infrastructure ACLs are one of the most critical security control mechanisms that can be implemented in the network. An ACL is constructed and applied to specify necessary connections between hosts or networks and network devices. Common examples of these types of connections are eBGP, SSH, and SNMP. After the required connections have been permitted, all other traffic to the infrastructure is explicitly denied. All transit traffic that crosses the network and is not destined to infrastructure devices is explicitly permitted.

**NEW QUESTION: 3**

The Cisco UCS Director includes a set of wizards that guide through configuring features. Which three wizards are available in the Cisco UCS Director? (Choose three.)

- A. Storage Discovery
- B. VDC Creation
- C. FlexPod Configuration
- D. Device Discovery
- E. Zoning Creation
- F. Catalog Configuration

**Answer: B,C,D**

**NEW QUESTION: 4**

A customer is considering IBM Spectrum Protect and has

requested documentation that describes some reference architectures including IBM storage hardware and configuration requirements to help with their outline solution design. The technical specialist suggests using the IBM Spectrum Protect Blueprints documentation.

On which IBM site can this documentation be found?

- A. Techdocs
