NEW QUESTION: 2

A company develops a series of mobile games. All games use a single leaderboard service.

You have the following requirements:

*Code should be scalable and allow for growth.

*Each record must consist of a playedId, gameId, score, and time played.

*When users reach a new high score, the system will save the new score using the SaveScore function below.

*Each game is assigned an Id based on the series title.

You have the following code. (Line numbers are included for reference only.) You store customer information in an Azure Cosmos database. The following data already exists in the database:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: Yes

Code for CosmosDB, example:

```
// Parse the connection string and return a reference to the
storage account.
CloudStorageAccount storageAccount = CloudStorageAccount.Parse(
CloudConfigurationManager.GetSetting("StorageConnectionString")
);
// Create the table client.
CloudTableClient tableClient =
storageAccount.CreateCloudTableClient();
// Retrieve a reference to the table.
CloudTable table = tableClient.GetTableReference("people");
// Create the TableOperation object that inserts the customer
entity.
TableOperation insertOperation =
TableOperation.Insert(customer1);
```

Box 2: No

A new record will always be added as TableOperation.Insert is used, instead of TableOperation.InsertOrReplace.

Box 3: No

No partition key is used.

Box 4: Yes

NEW QUESTION: 3

An infrastructure team is at the end of a procurement process and has selected a vendor. As part of the final negotiations, there are a number of outstanding issues, including:

1. Indemnity clauses have identified the maximum liability
2. The data will be hosted and managed outside of the company's geographical location The number of users accessing the system will be small, and no sensitive data will be hosted in the solution.

As the security consultant on the project, which of the following should the project's security consultant recommend as the NEXT step?

- A. Develop a security exemption, as it does not meet the security policies
- B. Require the solution owner to accept the identified risks and consequences
- C. Mitigate the risk by asking the vendor to accept the in-country privacy principles
- D. Review the entire procurement process to determine the lessons learned

Answer: B
