Getting the test C_C4H225_11 certification maybe they need to achieve the goal of the learning process, have been working for the workers, have more qualifications can they provide wider space for development.

There is no denying that preparing for the exam is a time-consuming as well as energy-consuming process without valid C_C4H225_11 study guide materials, while the paradox is that a majority of the candidates for the exam are workers who don't have enough time to spend on preparing, and the good news for you is that our company is aimed at solving this problem by releasing high passing-rate C_C4H225_11 training materials for all of the workers in this field.

The most important and most candidate may concern is the pass rate of our C_C4H225_11 study guide, In addition, the C_C4H225_11 study dumps don't occupy the memory of your

Instead update the web.config file to include the applicationInitialization configuration element. Specify custom initialization actions to run the scripts.

Note: Some apps might require custom warm-up actions before the swap. The applicationInitialization configuration element in web.config lets you specify custom initialization actions. The swap operation waits for this custom warm-up to finish before swapping with the target slot. Here's a sample web.config fragment.

```
<system.webServer>
<applicationInitialization>
<add initializationPage="/" hostname="[app hostname]" />
<add initializationPage="/Home/About" hostname="[app
hostname]" />
</applicationInitialization>
</system.webServer>
```

NEW QUESTION: 3

Your network contains an Active Directory domain named contoso.com. The domain contains a member server named Server1. Server1 runs Windows Server 2012 R2 and has the Hyper-V server role installed.

You create an external virtual switch named Switch1. Switch1 has the following configurations:

- * Connection type: External network
- * Single-root I/O virtualization (SR-IOV): Enabled
- * Ten virtual machines connect to Switch1.

You need to ensure that all of the virtual machines that connect to Switch1 are isolated from the external network and can connect to each other only. The solution must minimize network downtime for the virtual machines.

What should you do?

- A.** Change the Connection type of Switch1 to Private network.
- B.** Remove Switch1 and recreate Switch1 as an internal network.
- C.** Remove Switch1 and recreate Switch1 as a private network.
- D.** Change the Connection type of Switch1 to Internal network.

Answer: C

Explanation:

You cannot change the type of vswitch from external to private when SR-IOV is enabled at vswitch creation -> you need to recreate the vswitch.
