It is the shortcut to pass exam by reciting the valid Exam [C\\_SAC\\_2107](#) Cram pdf, In this way, you can just start your learning immediately, Delighted performance you can get.

You can download these SAP practice exams instantly [SAP Certified Application Associate - SAP Analytics Cloud](#) after purchase or buy a simple PDF file for questions and answers, As you know, SAP Certified Application Associate - SAP Analytics Cloud actual exam is very difficult for many people especially for those [H12-821 V1.0-ENU Flexible Testing Engine](#) who got full-time job and family to deal with, which leave little time for them to prepare for the exam.

Our C\_SAC\_2107 training materials are professional practice material under warranty, Therefore, when you are ready to review the exam, you can fully trust our C\_SAC\_2107 practice torrent, choose our learning materials.

C\_SAC\_2107 Reliable Test Answers - Pass Guaranteed Quiz  
C\_SAC\_2107 - First-grade SAP Certified Application Associate - SAP Analytics Cloud Flexible Testing Engine  
Study SAP Certified Application Associate C\_SAC\_2107 real dumps with SAP Certified Application Associate C\_SAC\_2107 practice questions can help you save time and money, Students can also get decent jobs after getting necessary certification in SAP Certified Application Associate.

Through our SAP Certified Application Associate dumps, you will be successful in getting certification from SAP SAP Certified Application Associate, Our C\_SAC\_2107 practice materials enjoy a very high reputation worldwide.

More importantly, there are a lot of experts in our company, Are you staying up for the C\_SAC\_2107 exam day and night, On the whole, nothing is unbelievable, to do something [NCSE-Core Download Fee](#) meaningful from now, success will not wait for a hesitate person, go and purchase!

Contact live chat to know more, We keep you updated without [IPQ-435 Authorized Pdf](#) any delay, if the exam vendor introduces any change in the existing layout of your targeted exam.

#### **NEW QUESTION: 1**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need setup monitoring for tiers 6 through 8.

What should you configure?

- A. an alert rule to monitor storage percentage in elastic pools that emails data engineers
- B. an alert rule to monitor CPU percentage in elastic pools that emails data engineers
- C. an alert rule to monitor CPU percentage in databases that emails data engineers
- D. extended events for average storage percentage that emails data engineers
- E. an alert rule to monitor storage percentage in databases that emails data engineers

**Answer: A**

Explanation:

Scenario:

Tiers 6 through 8 must have unexpected resource storage usage immediately reported to data engineers.

Tier 3 and Tier 6 through Tier 8 applications must use database density on the same server and Elastic pools in a cost-effective manner.

Topic 3, Litware, inc

Overview

General Overview

Litware, Inc, is an international car racing and manufacturing company that has 1,000 employees. Most employees are located in Europe. The company supports racing teams that complete in a worldwide racing series.

Physical Locations

Litware has two main locations: a main office in London, England, and a manufacturing plant in Berlin, Germany.

During each race weekend, 100 engineers set up a remote portable office by using a VPN to connect the datacentre in the London office. The portable office is set up and torn down in approximately 20 different countries each year.

Existing environment

Race Central

During race weekends, Litware uses a primary application named Race Central. Each car has several sensors that send real-time telemetry data to the London datacentre. The data is used for real-time tracking of the cars.

Race Central also sends batch updates to an application named Mechanical Workflow by using Microsoft SQL Server Integration Services (SSIS).

The telemetry data is sent to a MongoDB database. A custom application then moves the data to databases in SQL Server 2017. The telemetry data in MongoDB has more than 500

attributes. The application changes the attribute names when the data is moved to SQL Server 2017.

The database structure contains both OLAP and OLTP databases.

Mechanical Workflow

Mechanical Workflow is used to track changes and improvements made to the cars during their lifetime.

Currently, Mechanical Workflow runs on SQL Server 2017 as an OLAP system.

Mechanical Workflow has a named Table1 that is 1 TB. Large

aggregations are performed on a single column of Table 1.

#### Requirements

##### Planned Changes

Litware is the process of rearchitecting its data estate to be hosted in Azure. The company plans to decommission the London datacentre and move all its applications to an Azure datacentre.

##### Technical Requirements

Litware identifies the following technical requirements:

- \* Data collection for Race Central must be moved to Azure Cosmos DB and Azure SQL Database. The data must be written to the Azure datacentre closest to each race and must converge in the least amount of time.
- \* The query performance of Race Central must be stable, and the administrative time it takes to perform optimizations must be minimized.
- \* The datacentre for Mechanical Workflow must be moved to Azure SQL data Warehouse.
- \* Transparent data encryption (TDE) must be enabled on all data stores, whenever possible.
- \* An Azure Data Factory pipeline must be used to move data from Cosmos DB to SQL Database for Race Central. If the data load takes longer than 20 minutes, configuration changes must be made to Data Factory.
- \* The telemetry data must migrate toward a solution that is native to Azure.
- \* The telemetry data must be monitored for performance issues. You must adjust the Cosmos DB Request Units per second (RU/s) to maintain a performance SLA while minimizing the cost of the Ru/s.

##### Data Masking Requirements

During rare weekends, visitors will be able to enter the remote portable offices. Litware is concerned that some proprietary information might be exposed. The company identifies the following data masking requirements for the Race Central data that will be stored in SQL Database:

- \* Only show the last four digits of the values in a column named SuspensionSprings.
- \* Only Show a zero value for the values in a column named ShockOilWeight.

#### **NEW QUESTION: 2**

- A. Option B
- B. Option A
- C. Option C
- D. Option D

**Answer: D**

**NEW QUESTION: 3**

Your network contains an Active Directory forest. The forest contains a domain named contoso.com.

The domain contains three domain controllers.

A domain controller named lon-dc1 fails. You are unable to repair lon-dc1.

You need to prevent the other domain controllers from attempting to replicate to lon-dc1.

Solution: From Active Directory Sites and Services, you remove the object of lon-dc1.

Does this meet the goal?

A. Yes

B. No

**Answer: B**
