Lagunamarine's claim is the 100% success of its clients, And if you want to pass the C-THR86-2105 exam, you should choose our C-THR86-2105 torrent prep to help you.

NEW QUESTION: 1

A database warehousing application is beginning to experience decreases in its message throughput, but messages are still

being processed. The application is required to log each transaction to the database warehouse prior to sending the transaction downstream for processing. The application also recently scaled up to process larger batches of updates. What is a possible cause for the performance degradation being experienced by this application?

- A. The queue sizes need to be increased to handle the larger batches of message
- B. The queue manager needs to be modified to use the high message throughput mode.
- C. The space allocated for queue manager logs needs logs be increased
- D. The MQPUT calls need to be recompiled to use 64bit memory buffering

Answer: B

Answer: D

Explanation:

URL filtering allows you to control access to Internet websites by permitting or denying access to specific websites based on information contained in an URL list. You can maintain a local URL list on the router. If the Cisco IOS image on the router supports URL filtering but does not support Zone-based Policy Firewall (ZPF), you can maintain one local URL list on the router to add or edit an URLs. Enter a full domain name or a partial domain name and choose whether to Permit or Deny requests for this URL.
