NEW QUESTION: 1

You are designing a recovery strategy for your Azure SQL Databases.

The recovery strategy must use default automated backup settings. The solution must include a Point-in time restore recovery strategy.

You need to recommend which backups to use and the order in which to restore backups.

What should you recommend? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

All Basic, Standard, and Premium databases are protected by automatic backups. Full backups are taken every week, differential backups every day, and log backups every 5 minutes.

NEW QUESTION: 2

Which option is a benefit of Unified Fabric Delivery to an IT organization?

- A. increased storage capacity
- B. improved security
- C. reduced memory requirements
- D. lower total cost of ownership

Answer: D

Explanation:

Cisco Unified Fabric is the interconnection point for applications, stored data, and users that can help you:

- * Build an intelligent, high-performing infrastructure with multidimensional scalability for the data center network
- * Simplify your data center architecture and reduce costs with LAN and SAN convergence, helping you reduce capital costs with fewer devices, simpler management, and more flexible configuration policies

* Create an open, programmable network backbone that is easier and faster to deploy and manage Reference:
