NEW QUESTION: 3

An infrastructure as a Service cloud provider provides both single tenant and multi-tenant virtual machine based cloud offerings using the Xen hypervisor. A zero-day vulnerability is found with Xen and is being reported and managed by the closed community established by Xen for managing these types of situations. The cloud provider is a member of this closed community. What is the communication flow between cloud provider and customer throughout the management and resolution of this issue?

- A. None - the cloud provider may not communicate anything to the customer until the communication of the vulnerability (embargo) is allowed by the closed community.
- B. Closed community to customer - notification that there is a vulnerability and that customer must notify cloud provider to schedule updates/remediation.
- C. Customer to cloud provider - notification that there is a vulnerability and scheduling of vulnerability patch deployment to avoid impact on customer's production workload.
- D. Cloud provider to customer - notification that there is a vulnerability and that cloud provider is taking steps to address.

Answer: A

Explanation:

Explanation/Reference:
