Answer: E

Explanation:

ACS Forwarders Separated from the ACS Collector by a Firewall
Because of the limited communication between an ACS forwarder and an ACS collector you only need to open the inbound TCP port 51909 on a firewall to enable an ACS forwarder, separated from your network by a firewall, to reach the ACS collector.

You have a database hosted on SQL Server 2012 R2.

The database contains 5 million rows.

You need to recommend a repeatable method to migrate the database to SQL Azure.

Which method should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

A. Generate scripts to create all of the all database objects and all of the data, and then execute the scripts by using SQL Azure.

B. Create a SQL Server Integration Services (SSIS) package, and then run the package.

C. Back up the database, and then restore the database.

D. Extract a data-tier application, and then import the application.

Answer: B

Explanation:

SQL Server Integration Services

Most flexibility

Data Transfer Efficiency:

Good

- SSIS can be used to perform a broad range of data migration tasks. SSIS provides support for complex workflow and data transformation between the source and destination.

It is a good choice to transfer of data for databases that require many changes to work on Microsoft Azure SQL Database. You can use SSIS data transfer packages with another mechanism for transferring the database schema, such as a Data-tier Application package.
