It's enough to pass the exam in three **AD0-E401 Top Exam Dumps** to five days with accurate practice test questions & correct answers.

#### **NEW QUESTION: 1**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure ML experiment that contains an intermediate dataset.

You need to explore data from the intermediate dataset by using Jupyter.

Solution: You add a Convert to CSV module to the Azure ML experiment and then open the module output in a new notebook. Does this meet the goal?

A. Yes

B. No

**Answer: A**

Explanation:

Explanation/Reference:

Explanation:

Access intermediate datasets from Machine Learning experiments  
The following steps show an example that creates an experiment, runs it and accesses the intermediate dataset.

1. Create a new experiment.
2. Insert an Adult Census Income Binary Classification dataset module.
3. Insert a Split module, and connect its input to the dataset module output.
4. Insert a Convert to CSV module and connect its input to one of the Split module outputs.
5. Save the experiment, run it, and wait for it to finish running.
6. Click the output node on the Convert to CSV module.
7. When the context menu appears, select Generate Data Access Code
8. Select the code snippet and copy it to your clipboard from the window that appears..
9. Paste the code in your notebook.

Note: After an experiment is run in the Machine Learning Studio, it is possible to access the intermediate datasets from the output nodes of modules. Intermediate datasets are data that has been created and used for intermediate steps when a model tool has been run.

Intermediate datasets can be accessed as long as the data format is compatible with the Python client library.

The following formats are supported (constants for these are in the `azureml.DataTypeId` class):

PlainText

GenericCSV

GenericTSV

GenericCSVNoHeader

GenericTSVNoHeader

D. ãf¬ã, ðãfð2ãf«ãf¼ãf-

**Answer: D**

**NEW QUESTION: 3**

A customer wants to automate the send of a monthly promotional email. The customer will upload an audience file to their account's Enhanced SFTP on a monthly basis on the 15th day of each month, expecting the email to be deployed upon completion of the import activity. However, if the 15th of the month falls on a Saturday or Sunday, the customer will provide the file on the Friday prior to the 15th and expect the promotional email to be sent on that Friday.

Which method should be used to automate their monthly promotional email?

- A. Create a file drop automation which includes an Import File Activity and triggered send.
- B. Create a scheduled daily automation which includes an Import File Activity and Send Email Activity.
- C. Create a scheduled monthly automation which includes an Import File Activity and triggered send.
- D. Create a file drop automation which includes an Import File Activity and Send Email Activity.

**Answer: C**

**NEW QUESTION: 4**

Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series.

Information and details provided in a question apply only to that question.

You have a database that contains several connected tables. The tables contain sales data for customers in the United States only.

All the sales data is stored in a table named table1. You have a table named table2 that contains city names.

You need to create a query that lists only the cities that have no sales.

Which statement clause should you add to the query?

- A. GROUP BY
- B. MERGE
- C. GROUP BY ROLLUP
- D. GROUP BY CUBE
- E. UNPIVOT
- F. LEFT JOIN
- G. CROSS JOIN
- H. PIVOT

**Answer: F**
