Simulation for the software version, The tough topics of SAP Certification C_FIOAD_1909 certification have been further made easy with examples, simulations and graphs.

Or you can apply for refund too, we support full refund, The answer is that you get the C_FIOAD_1909 certificate, On the other hand, C_FIOAD_1909 exam guide can give you the opportunity to become a senior manager of the company, [Exam C1000-018 Fees](#) so that you no longer engage in simple and repetitive work, and you will never face the threat of layoffs.

Free Assistance on Your Certification Exams, You will enjoy learning on our C_FIOAD_1909 exam questions for its wonderful and latest design with the latest technologies applied.

NEW QUESTION: 1

- A. Option A
- B. Option D
- C. Option C
- D. Option B

Answer: D

NEW QUESTION: 2

Fill in the blank: The R80 feature _____ permits blocking specific IP addresses for a specified time period.

- A. Suspicious Activity Monitoring
- B. Adaptive Threat Prevention
- C. Local Interface Spoofing
- D. Block Port Overflow

Answer: A

Explanation:

Explanation/Reference:

Explanation :

Suspicious Activity Rules Solution

Suspicious Activity Rules is a utility integrated into SmartView Monitor that is used to modify access privileges upon detection of any suspicious network activity (for example, several attempts to gain unauthorized access).

The detection of suspicious activity is based on the creation of Suspicious Activity rules. Suspicious Activity rules are Firewall rules that enable the system administrator to instantly block suspicious connections that are not restricted by the currently enforced security policy. These rules, once set (usually with an expiration date), can be applied immediately without the need to perform an Install Policy operation Reference: https://scl.checkpoint.com/documents/R76/CP_R76_SmartViewMonitor_AdminGuide/17670.htm

NEW QUESTION: 3

You need to make the "Distance" header of the table bold in the Views/RunLog/GetLog.cshtml view.

Which code segment should you use?

- A. `table+first-child{ font-weight: bold; }`
- B. `table>tr{ font-weight: bold; }`
- C. `table>th:last-child{ font-weight: bold; }`
- D. `table>tr>th:nth-child (2) { font-weight: bold; }`

Answer: D

Explanation:

Topic 1, Olympic MarathonBackground

You are developing an ASP.NET MVC application in Visual Studio 2012 that will be used by Olympic marathon runners to log data about training runs.

Business Requirements

The application stores date, distance, and duration information about a user's training runs. The user can view, insert, edit, and delete records.

The application must be optimized for accessibility.

All times must be displayed in the user's local time.

Technical Requirements

Data Access:

Database access is handled by a public class named RunnerLog.DataAccess.RunnerLogDb.

All data retrieval must be done by HTTP GET and all data updates must be done by HTTP POST.

Layout:

All pages in the application use a master layout file named \Views\Shared_Layout.cshtml.

Models:

The application uses the \Models\LogModel.cs model.

Views:

All views in the application use the Razor view engine.

Four views located in \Views\RunLog are named:

- * _CalculatePace.cshtml
- * EditLog.cshtml
- * GetLog.cshtml
- * InsertLog.cshtml

The application also contains a \Views\Home\Index.cshtml view.

Controllers:

The application contains a \Controllers\RunLogController.cs controller.

Images:

A stopwatch.png image is located in the \Images folder.

Videos:

A map of a runner's path is available when a user views a run log. The map is implemented as an Adobe Flash application and video. The browser should display the video natively if possible, using H264, Ogg, or WebM formats, in that order. If the video cannot be displayed, then the Flash application should be used.

Security:

You have the following security requirements:

- * The application is configured to use forms authentication.
- * Users must be logged on to insert runner data.
- * Users must be members of the Admin role to edit or delete runner data.
- * There are no security requirements for viewing runner data.
- * You need to protect the application against cross-site request forgery.
- * Passwords are hashed by using the SHA1 algorithm.

RunnerLog.Providers.RunLogRoleProvider.cs contains a custom role provider.

Relevant portions of the application files follow. (Line numbers are included for reference only.) Application Structure

NEW QUESTION: 4

Chatter

A.

B.

C.

D.

Answer: A,C
