#### **NEW QUESTION: 1**

You have a database that contains both disk-based and memory-optimized tables.

You need to create two modules. The modules must meet the requirements described in the following table.

Which programming object should you use for each module? To answer, select the appropriate object types in the answer area.

#### **Answer :**

Explanation:

Explanation

Module 1: Interpreted stored procedure

An interpreted stored procedure can access both disk-based and

memory-optimized tables.

Module 2: Natively compiled stored procedure

Natively compiled stored procedures are Transact-SQL stored procedures compiled to native code that access memory-optimized tables. Natively compiled stored procedures allow for efficient execution of the queries and business logic in the stored procedure.
