You can trust our HP2-H95 practice questions as well as us.

NEW QUESTION: 1

Your network contains an Active Directory domain named contoso.com. Domain controllers run either Windows Server 2008, Windows Server 2008 R2, or Windows Server 2012.

You have a Password Settings object (PSOs) named PS01.

You need to view the settings of PS01.

Which tool should you use?

- A. Active Directory Administrative Center
- B. Get-ADAccountResultantPasswordReplicationPolicy
- C. Get-ADDomainControllerPasswordReplicationPolicy
- D. Local Security Policy

Answer: A

Explanation:

Up until now, PSOs were created with the ADSI Edit application or PowerShell. Now, we can use the Active Directory Administrative Center.

Note:

*Password Setting Object (PSO) is another name for Fine Grain Password Policies. These PSOs allowed us to set up a different password policy based on security group membership.

*Storing fine-grained password policies Windows Server 2008 includes two new object classes in the Active Directory Domain Services (AD DS) schema to store fine-grained password policies: / Password Settings Container / Password Settings
The Password Settings Container (PSC) object class is created by default under the System container in the domain. It stores the Password Settings objects (PSOs) for that domain. You cannot rename, move, or delete this container.

NEW QUESTION: 2

Which of the following steps can you perform in the planning board as a dispatcher? Choose Two correct answers.

- A. Create technician skills
- B. Release assignments
- C. Enter materials used
- D. Define core hours.

Answer: B,D

NEW QUESTION: 3

- A. Option A
- B. Option D
- C. Option C
- D. Option B

Answer: C

NEW QUESTION: 4

- A. Option A
- B. Option C
- C. Option D
- D. Option B

Answer: D
