**NEW QUESTION: 1**

On a Cisco IOS XR router, which mechanism protects the router resources by filtering and policing the packets flows that are destined to the router that is based on defined flow-type rates?

- A. LPTS
- B. Control Plane Policing
- C. ACL
- D. NetFlow
- E. Committed Access Rate
- F. Management Plane Protection
- G. LLQ

**Answer: A**

Explanation:

Local Packet Transport Services (LPTS) maintains tables

describing all packet flows destined for the securedomain router (SDR), making sure that packets are delivered to their intended destinations. The Low Latency Queueing feature brings strict priority queueing to Class-Based Weighted Fair Queueing(CBWFQ).

**NEW QUESTION: 2**

Joe is a helpdesk specialist. During a routine audit, a company discovered that his credentials were used while he was on vacation. The investigation further confirmed that Joe still has his badge and it was last used to exit the facility. Which of the following access control methods is MOST appropriate for preventing such occurrences in the future?

- A. Access control system where badges are only issued to cleared personnel
- B. Access control where employee's access permissions is based on the job title
- C. Access control where system administrators may limit which users can access their systems
- D. Access control where the credentials cannot be used except when the associated badge is in the facility

**Answer: D**

**NEW QUESTION: 3**

Refer to the screen capture below:
